HISTORY

Otto White learned bootmaking from his father, who learned it from his father, who learned on the job, shoeing loggers and soldiers in the Blue Ridge Mountains in the late 1800's.

By the time Otto and his father set up shop in Spokane in 1915, White's Boots already had a reputation for making the most comfortable and durable boot money could buy.

Otto himself remained active in the factory until his death in 1972, passing on his commitment to quality craftsmanship the best way he knew how - training the next generation of bootmakers. Today, White's continues to do things Otto's way: by hand.

Otto was convinced that nothing short of a fully customized fit could meet the harsh demands of a day spent cutting fire line, climbing electrical poles, or bucking logs, and we think he was right. That's why we continue to produce our All-Leather Legend - crafted entirely of thick, durable leather, our boot changes and matures as you wear it, becoming more comfortable and more yours with each passing day.

The White's legacy is a boot inspired by the men and women who will wear it: tough, determined, and proud. Anything you can ask of a White's Boot it can perform, because no matter who you are, you deserve the best boot money can buy.

WELCOME TO THE WHITE'S LEGACY– WE'RE GLAD YOU'RE HERE.

White's Boots is an ISO 9001:2015 Registered Company.

ANATOMY OF A

LEGEND

1. FULL GRAIN LEATHER UPPER
2. SOLID BRASS HOOKS AND EYELETS
3. ALL-LEATHER INSOLE
4. ALL-LEATHER MIDSOLE
5. ALL-LEATHER ARCH-EASE™ SHANK
6. ALL-LEATHER HEEL COUNTER
7. ALL-LEATHER HEEL BASE

As most companies integrate machine lasting and synthetic construction elements for the sake of speed, White's remains committed to the painstaking, all-leather construction that has made us an international legend.

The only boot that will truly stand the test of time is a boot that can change, develop, and mature as it is worn. From the beginning, whether building a shoe for a logger, a miner, or a clerk, White's has been obsessed with the all-day comfort provided by true, all-leather construction, made to form to the foot. No steel shanks. No composite midsoles. And no cutting corners. Our premium hand-sewn stitch down White's Boots are made with:

ALL-LEATHER MIDSOLE & HEEL

Providing a solid and yet forgiving foundation, with a high enough arch to allow the foot to maintain its natural resting posture throughout wear.

ALL-LEATHER SHANK

Forms to the foot, unlike the rigid steel shank favored by most boot companies. Included for the sake of a long-lasting product, steel's very strength is its greatest weakness: it cannot favor the arch of the individual foot. Our all-leather shank provides more comfort for much longer, allowing the entire boot to mature over the length of its life.

CUSTOMIZABLE

In addition, a White's Boot is fully Customizable. Even though most men fit into one of our standard sizes, every man's foot is different. That's why we have been making Made to Measure boots since our founding in 1853. To Otto White, making a high quality, handsome boot wasn't nearly so important as making a boot to fit the man, and we continue to do things Otto's way today.

LEGACY BOOTS

Since 1853, the legacy of White's Boots has been in service to the American worker. Loggers and log drivers started wearing our boots in 1880. Linemen wore them in 1930. Horse packers wore them in 1936 and smokejumpers in 1939. Throughout our history, we've built our boots to be worn into the dust. From Virginia to Idaho to Washington, we're still here building our boots the same way. That means you can still wear a piece of our history and the history of America.

THE ORIGINAL 350 CRUISER

350-C

HAND-SEWN CONSTRUCTION STITCHDOWN

The Original 350 Design From The 1930s.

Between the world wars, timber cruisers started asking Otto White for a lighter, less cumbersome version of their tried and true White's logger. After expanding production, Otto decided to redesign the traditional uppers found on most work boots in the early 20th century. As a result, the 6-inch 350 was born. Since the 1930s, it's been a staple for outdoorsmen and sportsmen in the Pacific Northwest and around the world.

FIRE BOOTS

From smokejumpers to hotshots, our wildland firefighter boots have been serving American forest workers for more than 80 years. The legend of White's Boots started in 1939 when Francis Lufkin wore his pair of Summer Loggers into the first smokejumper camp in Methow Valley, WA. All it took was one boot, and we're still here in Spokane, WA building it the same way.

A New Standard in Fire Boots—Built Dependable for The Whole Crew.

Whether fresh out of training or coming back to put another fire season under your belt, this NFPA-certified boot was built to be a solid, no-fuss option. It offers out-of-the-box comfort from the padded collar and lower-arched 1972 Last and underfoot durability from the Goodyear Welt construction and Vibram® Unit Lug 135 Red Dot Sole. The Crew Boot sets the standard for a fire boot you can put on the day before your first assignment and forget about until you get back home. Suitable for your first year out, dependable enough for the whole crew.

White's Proprietary Fire & Ice white dot Hybrid Sole by Vibram®

Designed for an easier break in period, and built for enhanced footing against the unpredictable terrain of the wild, this boot is built to keep you on your feet at all times.

After several years of testing this boot against the highest NFPA standards, we're proud to introduce our new Fire Hybrid. Hand-crafted with McKay Stitchdown construction in our Spokane factory, the Fire Hybrid offers a block heel and side hill traction for increased stability, cleats on the heel and toe for better incline support, and military grade 360 lugs to keep the sole free of debris. Coming to you by way of our top bootmakers, welcome to the next generation of fire boots.

Since 1930, the most versatile work boot is the famed Otto White 350.

It spans across every Pacific Northwest trade—drivers, cruisers, miners, sportsmen, brakemen, and factory workers. Not surprisingly, it's a boot that is built and worn for everyday wear, including days off. Thousands of workers have walked into our retail shop in Spokane thinking they came to buy something else, but they walk out with the 350 on their feet. Now available in Stitchdown construction—resoleable and rebuildable—for the first time in our history, enjoy the Anatomy of a Legend at a more affordable price without losing an ounce of durability in the field.

Introducing The All New C355 Logger in Stitchdown Construction.

Throughout our 169 years of building boots for woodsmen, the 7-inch upper has been reserved for custom orders alone. Despite its popularity across the Pacific Northwest trades, especially forestry, our catalogs have never offered a 7-inch upper as a standard choice. The reason for the raised height of the upper is due to several factors. It provides additional support for the ankle while still maintaining the versatility found in our iconic 6-inch upper. The additional inch in height also balances the weight and lift of the Vibram® Lug sole against the ground, which better supports the foot and ankle on uneven trails, shifting terrain, and steeper slopes. Drivers, cruisers, choke setters, and forestry workers have been making this choice for years and now it's available to our growing list of workers across the world.

FREEDOM
CMB9170-V

True to the spirit of its motorcycle ancestor, this boot is a road warrior, unapologetic for its rugged look.

We took the 4811 last that produced our tried and true Smokejumper boot and converted it to a square toe, perfect for toeing motorcycle pegs and barstools alike, because at White's, we believe every man deserves the best, even on the weekends. Slip into comfort and go for a ride.

WORK & FIELD BOOTS

The health and safety of the American worker has always been at the heart of what we do at White's Boots. Loggers, miners, linemen, road workers, factory workers, and workers across the trades have been wearing our boots into the ground since 1853. As long as they keep doing their job, we'll keep doing ours—one boot at a time.

STARTING AT
$780.00

THE LINEMAN SERIES

The lineman stands alone amongst the competition both in quality and value.

When it comes to designing a boot that meets workers needs without compromising job performance, the lineman stands alone amongst the competition both in quality and value. We've taken all the durability and comfort of our traditional hand lasted and hand sewn construction, and packed it into an Electrical Hazard Lineman boot (Special Order Only).

Tested and proven in the Pacific Northwest.

Built for just about anything. The best workwear in the Pacific Northwest requires versatility. The history of White's Boots is marked by outfitting workers in every trade. Taking inspiration from the same performance standards as our Fire Hybrid, the Hillyard is designed for day-after-day serviceability. Built on the 610 Last, it provides a minimal break-in period, ongoing durability of full grain leather upper, and years of utility with a Goodyear Welt construction. The White's proprietary unit lug sole makes this a perfect boot for construction sites, factories, and jobs in the field. Every component of the Hillyard is built with our commitment to high performance. We built it for just about anything.

WHITE'S BOOTS®

SINCE 1853

GRANDE RONDE SERIES

In the wild, an outdoorsman only notices his boot when it lets him down. A steep climb becomes steeper. A wide crossing becomes wider. Since 1853 our boots have conquered the harsh demands of Mother Nature allowing the men who wear them to do the same. That's why we're introducing the Grande Ronde Series—for you, the outdoorsman. Tested and proven in the Pacific Northwest—rivers, forests, and rain—these boots are designed to never let you down.

SELWAY

HH610

Built with the unpredictable terrain in mind.

Since launching the Grand Ronde Series, our goal has been to provide outdoorsmen with all the benefits of modern footwear technology without sacrificing any of the high performance standards we've been pioneering since 1853. The Selway is another addition to that commitment. It's built with the unpredictable terrain in mind. Climbing up or back down, anyone trekking on the side of a hill or alongside a river can rely on the stability and safety it provides.

BOOT CARE

A pair of White's isn't just a pair of boots - it's a crucial investment in your livelihood, no matter what your line of work. And as all good investments do, White's Boots reward those who treat them with care. Preserve and protect your investment with our line of recommended boot care products.

As we always say, the only thing better than putting on a pair of White's is knowing you'll never have to part with them. Take care of your boots, and they'll take care of you.

Lace Prices

Boot Ht.	*Length*	*Leather*	*Nylon*
10"	80"	$12.00	$6.00
12"	90"	$13.00	$6.50
14 & 16"	108"	$14.00	$7.00

False Tongue Prices

Color	*Standard*	*LTT*
Black, Brown, or Red Dog	$7.00	$8.00

Oils & Preservatives Prices

Product	*Size*	*Price*
Boot Oil	128 oz.	$70.00
Boot Oil	64 oz.	$58.00
Boot Oil	16 oz.	$24.00
Preservative	16 oz.	$29.00
Preservative	8 oz.	$20.00

FALSE TONGUES & LACES

Tongues: false tongues are an inexpensive way to protect your boots. Simply lace them in. One size fits all. Available in Brown, Black, or Red Dog leather.

Laces: choose from leather or nylon laces in a variety of lengths. Refer to our length chart to select the appropriate lace for your specific boot.

OILS & PRESERVATIVES

100% natural, all-season boot care oil and preservative. Contains a longer lasting beeswax /propolis suspension with anti-bacterial properties. Preserves and protects against moisture, mildew, bacteria and salt. Will not soften leather or rot stitching. Made in the USA.

REBUILDING

One remarkable advantage of investing in our boots is that they are rebuildable. By eliminating synthetic material and fillers, White's all-leather construction enables worn-out boots to be returned to like-new condition.

5 Reasons to Have Your Boots Rebuilt

1. INVESTMENT

You'll receive years of service from your rebuilt boots, just as you would from a new pair of boots.

2. QUALITY WORKMANSHIP

Our craftsmen treat every boot with the same care, rebuild and brand new build alike - you'll recognize the same time-proven quality in your rebuilt boots as you did in your first pair of White's Boots.

3. QUALITY MATERIALS

Rebuilt boots are made of the same heavy-duty materials we use to make our new boots.

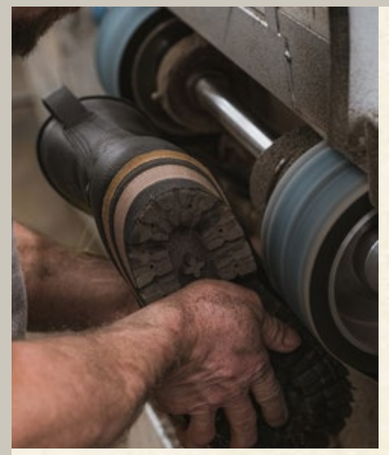
4. COMFORT

White's rebuilds your boots on the original last (mold) to maintain our legendary "Arch-Ease" support.

5. PRICE

For a lower price than the cost of a brand new boot, we can replace every component of your boot except the upper quarters - that means worn-out insoles, midsoles, outsoles, heels, toe-leather, and heel-leather can all be replaced at a fraction of the cost of a brand new boot. Same quality leathers, same durable results - the only thing better than reaching for your favorite pair of boots is knowing you'll never have to part with them.

NOTE - Quotation of repair costs can be made only upon boot inspection. White's master craftsmen will do only the work required to return your boots to first-class condition.



CUSTOMIZATION

In 1946, a WWII veteran named Ray Plowman walked into White's Shoe Shop with half a left foot.

A landmine in the field of battle had claimed the other half. So Otto put his best boot-maker on the job of making Ray a shoe last that could be used over and over again until the day he died; and it was. Built and rebuilt countless times, his boots were one of a kind. If we can make a boot for Ray, we can make one for you.

Call to customize your boots at (800) 541-3786 | **whitesboots.com**

LEATHER UPPER

Name the hide, pick a color, and we've made a boot with it. From cowhide to shark-skin, White's customers all over the world are wearing boots that are truly one of a kind. We stock the highest quality leather from the best tanneries around the world, including Horween® and Seidel, to provide a range of options wide enough to suit any taste.

SOLE

The composition of the material that stands between your foot and the earth is one of the most important things in the anatomy of a boot. We offer a wide array of soles, including Dainite and Vibram® soles. Whether you're in the wildlands or the concrete jungles, we'll provide the foundation you need for good traction and a comfortable fit.

HEEL

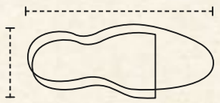
From a straight block heel to a slanted logger heel, and everything in between, let us know how you prefer to stand tall and we'll grind it down and buff it to your liking. The foundation of any great boot is a stacked leather heel: that's a given. But how it looks is up to you.

HARDWARE

The subtle importance of the trim on your boot is never lost on us. Choose the color and configuration of eyelets and speed hooks and we'll use your specifications. We stock a wide selection of brass that will hold everything together under the harshest conditions.

LAST

For most boots on the street, choosing the shoe last is not an option. Here at White's however, some of our traditional styles, such as the 350 and Semi Dress, can be built on several different lasts. For the true boot aficionado, we'll go to any lengths to accommodate customization. Let us know the arch support you prefer and we'll help you find the right fit.



MADE TO MEASURE

As we learned from Ray Plowman, not every foot is the same—even when the same man owns them both! That means a truly made-to-measure boot considers the dimensions of both feet individually. If you need one boot wider, narrower, longer, shorter, or even a completely different size than the other, we have you covered. No matter the landmine, we'll find a way.

WARRANTY

WARRANTY

White's boots are unquestionably warranted to be free of defects in material and workmanship one year from date of purchase.

Our warranty is an expression of our confidence in our materials and hand-crafted workmanship, which assures unsurpassed quality for rugged, dependable service. In the rare event of a defect under this warranty, we will, at our option, repair or replace the product.
